March 11, 2024

Dear Property Owner and/or Resident,

Starting March 18, as part of the preparatory work required to complete the new public space in early summer, the City's contractor will be removing 15 city-owned trees that have been identified as necessary to complete construction on the south side of Glen Road. This work is anticipated to take until late March to complete.

Several of the trees being removed may be near your residence. In order to ensure the safety and maintenance of the area, please remove any private items or landscaping that are situated near these trees. The City will not be responsible for any damage to private items on City property.

During this period of construction, there will be no access to the on-street parking spaces on Glen Road, south of Bloor Street East. To help with the temporary parking changes, if you currently have a residential on-street parking permit for Glen Road, you will receive a temporary residential on-street parking permit for the period of time when Glen Road permit parking spaces are unavailable.

The temporary permit will allow you to park within Zone 7H along Howard Street (see attached map). Once the work is completed, access to Glen Road parking spaces will be reinstated.

Please ensure you display the yellow sticker on the driver's side, just as you currently display your regular permit.

If you have any questions about the upcoming tree removal work, please contact the Field Ambassador at 416-495-4254 or via email at GlenRdPedBridgeTunnel@morrisonhershfield.com.

Thank you for your understanding and patience throughout this process.

Sincerely,

Maria Lippa
Field Ambassador
